

Dear FCC.

I am writing this letter to communicate to you that the quality of my morning and afternoon commutes to and from work are the only times I generally listen to the radio. I understand that XM Radio (and other satellite broadcasters) have the ability to provide me with local news, weather, and traffic on a specific channel which could rotate that information with a higher frequency than other broadcasters in my area. I feel strongly that XM Radio, in my case, provides me with a superior service that I directly pay for, and encourage the further programming development of such as I see it improves the quality of my life. I do not think that this is a matter in which the National Association of Broadcasters should have a say in what I am able to listen to. I pay for a service, and invest in a service that provides me with information better tailored to my needs... something that the local radio stations do not... hence why I invested in the service.

I am opposed to HR 4026!

Thank You
